9 Cubes (54 Categories), 25 Tokens, Brain Timer/Letter Generator (21 Letters)

Object

Think fast to name something in one of the categories and grab that cube, avoiding collecting Tokens if the random timer farts on your turn!

Set Up

- Place the Brain in the centre of the play area.
- Put 25 Tokens in a pile so everyone can reach them. You may use fewer if you want a shorter game time.
- Everybody grab some of the cubes and get ready to roll 'em!

Play

- Everyone rolls the cubes onto the playing area!
- Someone presses down on the top of the Brain—this starts the timer and displays a letter!
- The youngest player goes first, naming something in one of the categories shown on a cube, and it must start with the letter displayed.
- For example, if you see the category “Gross Things” and the letter displayed is “T,” you could say, “tarantulas!” on your turn!
- When you name something, grab that cube. The person to the left goes next, and so on.

- Play until the Brain farts or all cubes have been grabbed!
NOTE: The timer is random and could stop any time between 30 and 45 seconds...you never know! Just hurry because you don't want it to fart during your turn!
- If the Brain farts during your turn, the round ends and you must take a Token (you don't WANT Tokens...the goal is to be the player with the LEAST Tokens!).
- If all of the cubes are grabbed before time is up, the last player to grab a cube gets to give one of their Tokens to any player they choose! That player then gets to start the next round.
- Everyone pick up some cubes and roll them again, and press the top of the Brain again to get a new letter and start the timer. The player who got a Token in the previous round starts this new round.
- Keep playing until the pile of Tokens is gone!

Winning

When the Token pile is gone, count the Tokens you have. The player with the least wins! In the event of a tie, those players who tied play another round to determine the winner!
